

# Yellow Mold Instructions - Pet Prints

**Please read through entire instructions BEFORE beginning.  
Please follow these instructions closely for molding prints.**

Please note this mold compound is safe and non-toxic, but not edible. Please use care when molding prints with children and pets. This process should be completed by an adult. Complete instructions one print at a time. Each mold is individually packaged. Each individual mold contains two parts: yellow and white; 1:1 ratio.

This mold sets up at room temperature. Mold will set slower at cooler temps and faster in warmer temps.

1. Clean and pat dry pet's nose or paw before beginning.
2. Set up mold on a clean, dry, flat surface. (Recommend using a small dish.)
3. **START WITH A PEA SIZED AMOUNT TO TEST HOW QUICKLY IT SETS FIRST**, then use additional mold as directed below. Each container holds enough for about 2 trys per print ordered.
4. Combine yellow and white together with fingers completely. This should be a solid color, no white streaks.
5. Roll mixture into a ball, then press down flat to make a 'pancake' on a dish with your palm before imprinting.
6. Bring the dish with the mold 'pancake' to your pet's nose or paw and gently press and then pull directly away without smudging print if possible.
7. Mold will start to set within 30 seconds.
8. Place your dish with the completed mold in safe area where it will not be touched while it sets.
9. Let mold set for at least an hour without being touched to achieve best results and quality detail of print.

Repeat steps if you have ordered additional prints. Wash hands and pet's nose or paw when finished.

- Please place completed mold back in plastic bag provided. Make sure each is individually labeled with the name of person who ordered and with initials, short name, or date of your choice to be imprinted on the back of your piece.
- Your completed mold will be slightly flexible, so please return in protective bubble wrapping provided. (*ps... Sending back the empty mold containers also will help us recycle!*)
- Mail completed molds to: Laura Hagan, PO Box 95, Higginsville, MO 64037

Please allow 4-6 weeks for your prints to be crafted, unless another time frame has been previously discussed. Most importantly, have a fun time creating your molds and making a wonderful memory with your loved ones!
